Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A computerized method for generating a color template design comprising:
generating a histogram for a source image; and
suggesting a color ~~for subsequent user selection based on the generated histogram to~~ serve as the color for a template design used to display the source image, the template design including one of a foreground and background portion displayed with the source image.
2. (Currently Amended) The computerized method of claim 1, wherein the color suggested is a color that is automatically selected to matches a color of the source image.
3. (Original) The computerized method of claim 1, further comprises displaying at least one template design and at least one color for the template design.
4. (Original) The computerized method of claim 1, further comprising indicating a selected portion of the source image, wherein the selected portion is used to generate the histogram.
5. (Currently Amended) The computerized method of claim 1, wherein the suggested color is applied to ~~the portions of the template design~~ in lieu of the template design in its entirety selected from a group consisting of framing, mat, background, and foreground portions of the template design.
6. (Original) The computerized method of claim 1, further comprises:
executing an internet browsing application; and
generating a web page containing data that displays information selected from a group consisting of color template design data, advertisements, banners, text, graphics, and hotlinks.

Appl. No. 09/735,572
Amdt. Dated December 19, 2006
Reply to Office Action of September 20, 2006

7. (Original) The computerized method of claim 1, further comprising receiving compensation for providing the color template design.

8. (Original) The computerized method of claim 1, wherein the suggesting further comprises:

providing at least one color for selection by a user; and
allowing the user to select at least one of the provided colors.

9. (Original) The computerized method of claim 8, wherein the providing is selected from the group consisting of multiple colors and presenting the colors to a user for selection concurrently.

10 -13. (Cancelled).

14. (Currently Amended) A computerized system comprising:
a processor;
a memory coupled to the processor through a system bus;
a computer-readable medium coupled to the processor through the system bus; and
a color template design module executed from the computer-readable medium by the processor to cause the processor to generate a histogram for a source image, and to suggest a color based on the generated histogram to serve as the color for a template design that is used to display the source image and is separate from the source image, the suggested color being applied to portions of the template design selected from a group consisting of framing, mat, background, and foreground portions of the template design.

15. (Currently Amended) The computerized system of claim 14, wherein the color template design module suggested is automatically selects the suggested a color that matches a color of the source image.

Appl. No. 09/735,572

16. (Original) The computerized system of claim 14, wherein the color template design module causes the processor to display at least one template design and at least one color for the template design.

17. (Original) The computerized system of claim 14, wherein the color template design module causes the processor to indicate a selected portion of the source image, wherein the selected portion is used to generate the histogram.

18. (Original) The computerized system of claim 14, wherein the suggested color is applied to the portions of the template design selected from a group consisting of framing, mat, background, and foreground portions of the template design.

19. (Original) The computerized system of claim 14, wherein the color template design module causes the processor to execute an internet browsing application, and generate a web page containing data that displays information selected from a group consisting of color template design data, advertisements, banners, text, graphics, and hotlinks.

20. (Original) The computerized system of claim 14, wherein the color template design module causes the processor to receive compensation for providing the color template design.

21. (Original) The computerized system of claim 14, wherein the color template design module causes the processor to provide at least one color for selection by a user, and allow the user to select at least one of the provided colors.

22. (Original) The computerized system of claim 21, wherein the color template design module causes the processor to select from a group consisting of multiple colors and present the colors to a user for selection concurrently.

23 - 26. (Cancelled).

27. (Currently Amended) A computer-readable medium having computer-executable instructions to cause a server computer to perform a method comprising:

generating a histogram for a source image; and
suggesting a color for subsequent user selection based on the generated histogram to serve as the color for a template design that is separate from used to display the source image and operating as one of a foreground and background portion.

28. (Currently Amended) The computer-readable medium of claim 27, wherein the ~~color-suggesting~~ of the color is automatic with subsequent adjustment of the color by a user if the user rejects the color automatically suggested a color that matches a color of the source image.

29. (Original) The computer-readable medium of claim 27, further comprising:
executing an internet browsing application; and
generating a web page containing data that displays information selected from a group consisting of color template design data, advertisements, banners, text, graphics, and hotlinks.

30. (Original) The computer-readable medium of claim 27, wherein the suggesting further comprises:

providing at least one color for selection by a user; and
allowing the user to select at least one of the provided colors.

31 - 33. (Cancelled).
